The Pima variety of Egyptian cotton is the most profitable crop ever grown in this region. It is acknowledged to be the finest cotton pro duced, and destined to make this region famous the world over, and will bring high prices for many years to come. The labor shortage due to the working of the Draft Law, makes it imperative that employers of farm help get the maximum returns from their employes. In growing cotton, this means the ment, Nearly the entire output of steel is being taken by the government, leaving a big shortage to supply the domestic use of this country and the foreign demand, All authorities agree that next year will see a hig shoringe. If you intend to grow cotton, It is important that you buy your machinery and equipment now. We can supply you with the goods on orders placed now but do not know what we can do in six months.

1880 Acres

A Large Stock or Cotton Ranch About 1200 Acres in cultivation now, mostly alfalfa and more land being cleaned for 1918 crops. This property carries one of the best natural flow water rights in Southern Arizona. It is on the Gila, below Arlington, with-in shipping distance of Hassayampt, or the main line Southern Pacific. The soil is especially good and water avail-able all the time and all that can be able all the time and all that can be made use of on the ranch. It is an old established gravity system, with the best natural head on the Glia River. 1200 to 1500 head of cattle are being wintered on this property and an in-vestigation will convince any pros-pective purchaser that this is the best live stock or cotton proposition being offered today. The price is \$105,000 fa, dandy water and small house. dollars; less than

\$56.00 or less than 20 dollars per acre for

and now actually in use. We have made personal investigation and know this to be an exceptional buy. We can show you this pro and return to Phoenix same day.
